

CRIME STATISTICS REPORT Q2 2026

2026-07-09

Quarterly Crime Statistics Report

Purpose: The Delta Police Department (DPD) is committed to transparency and keeping our Police Board and the community informed. In addition to other methods, this quarterly report provides an overview of crime statistics for the most recent quarter. It reflects monitored offences, common crime types that we actively track as part of our intelligence-led policing strategies. Tracking these trends helps us identify issues, adjust strategies, and improve community safety and policing services.

Data Considerations

As with any data, there are some factors to consider:

1. **Reported vs Actual Incidents** – The data includes crimes and incidents that are reported to or discovered by the police. However, not all crimes are reported or come to police attention. Additionally, “unfounded” incidents are not included in this report. An incident is considered “unfounded” when a police investigation confirms that no crime occurred or was attempted.
2. **Data Updates and Changes** – These statistics reflect police records as of the extraction date noted on the cover page. Data and offence classification may change over time due to ongoing investigations, file reviews, quality control and late-reported incidents.
3. **Timing of Reported Incidents** – An increase in reported incidents during a quarter does not necessarily mean they occurred in that period — they may have happened earlier but were reported this quarter. Late reporting, particularly for sexual offences, can affect the data, as historical sexual assaults are often reported later.
4. **Differences in Reporting Methods** – The DPD uses the “all violations method,” which counts all offences in an incident. Other agencies may use the “most serious offence method,” which counts only the most serious offence. These differences should be considered when comparing DPD statistics with other police agencies or Statistics Canada.

TOTAL CALLS FOR SERVICE	1386	1479	1869	1597	6412	6484	-1%	12081	12166	-1%	↓

Important Note

Percentage changes for low-frequency crime types may appear large due to small absolute values, and should be interpreted in context. Even small changes in the number of incidents can result in large percentage shifts that may not reflect meaningful trends.

How to Read the Table

- Q# YoY % Chg** - Percentage difference between the current quarter and the same quarter last year.
- YTD** - Year-to-date totals from January 1 to the end of the reporting period.
- YTD % Chg** - Percentage difference between the year-to-date total for the current year and the same period in the previous year.
- YTD Trend** - Arrows indicate whether the current year-to-date total is higher (↑), lower (↓), or stable (→) compared to the previous year.
- The total for the current quarter may not match the sum of all four districts, as it includes incidents where the district or location is unknown.
